

## **Rogers Mesa Domestic Water Company Leak Policy**

If it is suspected that there is a leak on a member's side of their tap, resulting in gross leakage and loss of water over time, RMDWC will contact the member and pay to have the leak detected. After the detection and location of the leak, the member has one month to repair the leak. Once the leak is repaired RMDWC will forgive half of the fees associated with leakage overages. If after 30 days the leak is not repaired or there is not written notice to and approval by the Board of Directions of a plan to repair extended after the 30 day window, a charge of \$5.00/1000 gallons minimum will be applied to the leaking tap at the Board's discretion.
